A Calibration in GSE68086 (locked model)
Observed NSCLC fraction (95% CI)
Mean predicted probability (quintiles)
No alignment
Reference-batch ComBat-seq
B Dependence on gene availability
External AUC
Panel genes available in GSE68086 (of 18 measurable)
Locked model, missing genes imputed (median)
5th percentile
Re-trained on available genes (median)
5th percentile
